

SPILL CONTROL AND SECONDARY CONTAMINATION

Meltblown, Sonic Bonded pads in Chemical

These pads are heavy weight absorbent with a 286 gsm and 100 pads in a bale, resulting in a heavier per square metre fabric.

This fabric construction is unique in the fact that one side is very strong and less prone to stray fibres becoming detached whilst the other side is soft and absorbent. It combines some of the best features found in a laminated pad; (no-lint & durable) while reducing the slip problem associated with absorbents that feature lamination on both surfaces.

Each pad is 40 cm wide by 50 cm long (16" x 20") and is made from a top layer of spun-bond polypropylene that is then sonically bonded to an underside of meltblown fibres. The pads can be supplied in either a rigid cardboard box, which also acts as a dispenser, or a clear plastic bag.

Yellow colour code signals emergency use the absorbent is made up of two layers that are sonically welded together

Top layer is made of no lint, durable spun-bond polypropylene Core/base layer is made from high loft meltblown fibres Base layer is low slip making this a great product for foot traffic Pads are perforated down their center.

SPUN BOND SOCKS IN CHEMICAL

These socks are 1.2 metres in length and eight centimeters in diameter. There are 20 socks in the branded cardboard box. The socks feature a spun-bond outer sleeve that has a durable heat sealed seam running its entire length. The absorbent core is secured into the sleeve at each end with a durable plastic clip.

Chemical socks are filled with Super Absorbent Flake core which absorbs huge amounts of oil and water-based liquids such as solvents, hazardous chemicals, and every day spills such as milk or juice. Their most impressive quality is that they can soak up and retain virtually all liquids and are classed as a Chemical absorbent.

Key Features-

Will not become slippery even when fully saturated. Contains no polyacrylate

No lint spun-bond outer sleeve

Contains 95% recycled content

Contains proprietary Super Absorbent Flake

50% more absorbent than most competitor socks

Absorbs more and can stay on the job for longer which reduces

PILLOW IN CHEMICAL

These pillows feature a spun-bond outer surface that is both fast wicking and tough. The folded pocket of spun-bond fabric is filled with Super Absorbent Flake which is a new product technology and has many benefits.

Firstly, it is completely inert and not harmful unlike polyacrylate. It absorbs and holds liquids without any of the slippery or leaking gel problems associated with polyacrylate.

Secondly, it also out performs more traditional Chemical pillow absorption rates by up to 50%! Finally, Super Absorbent Flake pillows can soak up and retain virtually all liquids and are classed as a Chemical absorbent.

There are 10 pillows each measuring 40 cm wide by 50 cm long supplied in a branded cardboard box.

Key Features

Will not become slippery even when fully saturated. Contains no polyacrylate.

Strong spun-bond polypropylene outer fabric

Features a super absorbent flake core

Highly flexible pillow fits in tight spaces

Large surface area and absorbent contents soak up larger spills

CHEMICAL CLIP-TOP 15 LITRE SPILL KIT ▲

Featuring a robust two part male and female clip-top carrying handle, this spill kit is both easy to carry and store for all kinds of spill eventualities. The handle is securely fastened to the heavy weight plastic bag so it can be used over and over again. Own label branding can be added subject to order size. Please contact us for further details.

❖ **5 x Pads size 50 cm x 40 cm**

The pads in this spill kit are sonic bonded meltblown polypropylene Chemical. They have excellent wicking properties with the sonic bond points preventing stray fibres from becoming detached.

❖ **1 x Socks size 8 cm x 1.2 m**

These socks feature a spun-bond outer sleeve with a durable heat sealed seam. This tube is then filled with a next generation Super Absorbent Flake core and sealed with a durable plastic clip.

❖ **2 x Waste Bags and ties**

These are made from a tough grade of polythene and coloured dark blue. There is also a cable tie supplied so that the waste can be secured safely.

Key Features

Pads are meltblown polypropylene

Sock features a Super Absorbent Flake core and spun-bond outer

Meltblown, Chemical Sonic Bonded Roll-Weight 286 gsm*
MODEL: 286MBYRB

Absorbency 136 Litres | 36 US Gallons of oil 110 Litres | 29 US Gallons of water

Base Fibre Polypropylene With a heavy fabric weight of 286 gsm this roll at 46 metres long, is half the length when compared to the lighter weight 165 gsm 92 metre long version, but offers a much heavier per square metre product.

The roll is made from a single layer of meltblown which is sonically bonded together. The sonic bonding points makes the absorbent less prone to stray fibres becoming detached and also gives the roll a very even structure which contributes to the good absorbency rate. The yellow colour identifies this roll as suitable for emergency use.

The roll is 76 cm wide by 46 metres long (30" x 150') and is made from a single layer of meltblown fibres with bond points and features perforations down its length, every 19 cm (7.5") and across its width every 50 cm (20") at no additional cost. The roll can be supplied in either a rigid cardboard box or a clear plastic bag.

Key Features

Yellow colour code signals emergency use

The roll is made from a single layer of meltblown that is sonically bonded together

Good value and reliable performance

Made from high quality polypropylene

 **A.B.C. BROTHERS TECH (I) PRIVATE LIMITED**

286XMBWP

Meltblown, Oil only Non Bonded Pads- Weight 286 gsm*Absorbency 78 Litres | 21 US Gallons of oil
Base Fibre- Polypropylene

With a fabric weight of 286 gsm there are 100 pads in the bale, which is half the number when compared to the lighter weight 165 gsm 200 pad count version, and as a result offers a heavier per square metre product.

The lack of sonic welds makes this pad not as strong and more prone to short, fine fibres separating from the surface although the lack of sonic welds usually makes it more absorbent when compared to the same sonic bonded weight pad.

There are 100 pads in a bale with each pad measuring 40 cm by 50 cm. The pads can be supplied in either a rigid cardboard box or a clear plastic bag.

Key Features

The pad is made from a single layer of meltblown fibres.

Great value and reliable performance.

Made from high quality polypropylene

Pillows in Oil only 16WPILL2338

Pillows are ideal for absorbing spills or leaks that are too big for a pad or would require the pad to be replaced with much greater frequency. The pillow's fast-wicking large surface area helps reduce absorption times whilst its flexibility makes it easy to insert into difficult to reach spaces. There are 16 pillows each measuring 23 cm wide by 38 cm long, supplied in a branded cardboard box.

Key features: Fast-wicking surface area and high absorption capacity shortens clean-up time.

Large surface area and absorbent contents soak up larger spills.

Highly flexible pillow fits in tight spaces.

Application: An excellent product for placing around machinery or in workshop areas to prevent leaks or spills from spreading.

Fire retardant as per ASTM 726.

Avoid high-heat applications.

Ensure that disposal of these sorbents complies with all regulations

 **A.B.C. BROTHERS TECH (I) PRIVATE LIMITED**

20WS8120-SB Spun-bond Oil only Socks- Absorbency70 Litres | 18.5 US Gallons of oil

Base Fibre – Polypropylene

These socks are 1.2 metres in length and eight centimetres in diameter. There are 20 socks in the branded cardboard box.

The socks feature a tough spun-bond outer sleeve that has a durable heat sealed seam running its entire length. This tube is then filled with an absorbent polypropylene core that is made from recycled material. This core will absorb just oil-based fluids. The absorbent core is secured into the sleeve at each end with a durable metal clip. The spun-bond outer sleeve makes these socks very strong even when containing absorbed fluid; they are also a 'no-lint' product. These mean they will not shed any loose fibres. The socks are very flexible which allows them to conveniently mold to any uneven surfaces.

Key Features

Strong spun-bond outer sleeve

Meltblown polypropylene core

Clipped ends

Think Soak Think ABC

4WSNBOOM133 Sock-in-Net Oil only Boom -Absorbency151 Litres | 40 US Gallons of oil Base Fibre Polypropylene

This is the most economical construction of boom we offer. Comprising of an outer plastic netting that contains a spun-bond inner sock which in turn holds a 100% hydrophobic scrap core.

The booms feature rust proof snap hooks 60cm in from each end along with sturdy rust proof rings at each end, so that multiple booms can be attached to each other to form longer barrages. A tough nylon rope also runs the entire length and is secured at each end with double clips to maintain a strong and durable product.

Each boom is 13 cm in diameter and 3m long. There are 4 booms contained within the bale which is packed in a clear plastic bag.

Key Features

Nylon rope adds to strength and durability

End rings and snap hooks make deployment of the desired length fast and easy.

Resists snagging on debris

Made with recycled content

SWEEP4830 Oil only Sweep - Absorbency 73 Litres | 19 US Gallons of oil
Base Fibre - Polypropylene

Ideal for removing the final oil sheen from a spill, especially in marine clean-up situations. Sweeps are constructed from a heavy layer of meltblown polypropylene that is ultrasonically welded to a layer of white spun-bond fabric. At 30 metres long they are designed to sweep across streams and storm water discharge outlets, or they can be towed behind a boat.

Key Features

A heavy, 30 m layer of meltblown polypropylene ultrasonically welded to a white spun-bond cover a strong polyester belt runs along its length. This sweep absorbs oil-based liquids but resists water.

MAINTENANCE PADS

Meltblown, Double Lamination Pads in Maintenance 300XMBGPL

Featuring a fabric weight of 300 gsm there are 100 pads per bale which is quite a heavy fabric. This construction offers a very tough Maintenance absorbent which has both surfaces covered with a strong spun-bond polypropylene cover. This configuration offers unbeatable durability and results in an absorbent which also features virtually no-lint - that is to say that stray fibres won't become detached. Caution is recommended however, as any foot traffic should be avoided on this product as it can be very slippery under foot. Each pad is 40 cm wide by 50 cm long and is made from a highly absorbent meltblown core, sonically bonded between a top and bottom layer of spun-bond polypropylene. The pads are perforated down the middle. The pads can be supplied in either a rigid cardboard box, which also acts as a dispenser, or a clear plastic bag.

The strongest Maintenance sorbent in the meltblown family.

No lint. Meltblown core delivers high absorbency.

Tough spun-bond covers resist rips and abrasions, even when wet.

Durability reduces replacement costs

Application: The best choice when you need a tough, lint-free sorbent. Ideal for wiping sharp tools and equipment with rough edges. Great for lining spray booths. Durable enough to withstand moderate foot- and forklift traffic. Fire retardant as per ASTM 726. Ensure that disposal of these sorbents complies

Think So  ink ABC

MAINTENANCE SOCKS

20 Spun-bond Socks in Maintenance 20GS8120-SB

These socks are 1.2 metres in length and eight centimeters in diameter. There are 20 socks in the branded cardboard box. The socks feature a spunbond outer sleeve that has a durable heat sealed seam running its entire length. This tube is then filled with a next generation absorbent core that will absorb both oil-based and water-based fluids. The absorbent core is secured into the sleeve at each end with a durable metal clip. A unique feature of these socks is their ability to contain large quantities of liquids once absorbed. They are an excellent product for placing around machinery or in workshop areas to prevent leaks or spills from spreading. These socks are also a key component in any spill kit.K

Key features: Will not become slippery even when fully saturated. Contains no poly-acrylate. Strong spun-bond polypropylene outer sleeve. Features a super absorbent core. Clipped ends secure the core into the outer spunbond cylindrical sleeve.

Notes : Fire retardant as per ASTM 726. Ensure that disposal of these sorbents complies with all regulations.

PILLOWS IN MAINTENANCE

Model: 16GPILL915

These pillows feature a spun-bond outer surface that is both fast wicking and tough. This pocket of fabric is filled with a next generation absorbent core that will absorb both oil-based and water-based fluids. The absorbent core is secured into the pillow shape at each ends with a stitched seam. A unique feature of these pillows is their ability to contain large quantities of liquids once absorbed. They are an excellent product for placing under machinery or in workshop areas to prevent leaks or spills from spreading. There are 16 pillows each measuring 23 cm wide by 38 cm long supplied in a branded cardboard box.

Key features · Will not become slippery even when fully saturated. Contains no poly-acrylate. · Strong spun-bond polypropylene outer fabric. · Features a super absorbent flake core. · Highly flexible pillow fits in tight spaces. · Large surface area and absorbent contents soak up larger spills.

Application: An excellent product for placing around machinery or in workshop areas to prevent leaks or spills from spreading. Notes · Avoid high-heat applications · Ensure that disposal of these sorbents complies with all regulations.

Portable Zipper Bag 20 Litre Maintenance Spill Kit SK-UTB

Zipper Bag This light weight yet tough zipper bag is perfect for transporting a quantity of sorbents to the site of a spill. The bag features high visibility red vinyl material with a wipe-clean surface and a zipper fastening along with tough webbing handles. Stash them easily behind truck seats or in the toolbox. Great for indoor or outdoor use at construction sites or in off-road applications.

This spill kits feature a combination of pads and socks that will contain and recover a 20 litre spill of oil-based and water-based fluid as well as the essential equipment needed to handle the clean up process.

- ❖ 10 x Pads size 40 cm x 46 cm (16" x 18")
- ❖ 3 x Socks size 8 cm x 1.2 m (3" x 4')
- ❖ 1 x Waste Bag
- ❖ 1 pair of gloves Waterproof gloves help to ensure safe handling of spilled substance.
- ❖ 1 pair of goggles All-in one clear goggle provide eye protection from splashes

10 LITRE SPILL TRAY

Model: 10-BK-BK, ST1-10-GR-BK, ST1-10-B-BK.

- ❖ 155 x 400 x 300 mm (H x W x D)
- ❖ Designed for small containers

Containers can be placed inside tray or on platform
Ideal for bench top use in laboratories and worktops etc.

Nest able design

Yellow, black & green platform colours available

Made from 100% recyclable PE

30 LITER SPILL TRAY

Model: ST1-30-YE-BK, ST1-30-BK-BK, ST1-30-GR-BK, ST1-30-B-BK.

- ❖ 155 X 805X405mm
- ❖ 30 litre spill tray available in a variety of platform colours
- ❖ Ideal for storing small containers of chemicals in laboratories, workshops, stores, universities, schools, garages, farms etc
- ❖ Platform with hand inserts and viewing gaps for inspections and / or pump insertion
- ❖ Slip resistant platform surface
- ❖ Can be used with or without platform
- ❖ The unique nestable design saves storage space and optimises handling and delivery
- ❖ Easy to clean
- ❖ All trays black as standard

ST1-20-YE-BK, ST1-20-BK-BK, ST1-20-GR-BK, ST1-20-B-BK

- 155X600X400
- 20 litre spill tray available in a variety of platform colours
- Ideal for storing small containers of chemicals in laboratories, workshops, stores, universities, schools, garages, farms etc.
- Platform with hand inserts and viewing gaps for inspections and / or pump insertion
- Slip resistant platform surface
- Can be used with or without platform
- The unique nest able design saves storage space and optimizes handling and delivery
- Easy to clean
- All trays black as standard
