

ANTI SKID TAPE / LINE MARKING TAPE

SKID CARE: Anti-Skid Tape

- Quick, simple & easy to apply
- Exceptional slip prevention
- No specialist knowledge required
- Strong, long life adhesive keeping the product in place
- Usable on nearly all properly prepared surfaces (Clean, Dry, Smooth)
- Priming of concrete, cement & wood surfaces recommended.
- Durable, highly wear & tear resistant
- Forklift traffic resistant
- UV - Stable
- Wide useful temperature range -40 up to +80 C
- Installation temperature from +12C upwards
- Can be walked on immediately after installation
- Load bearing after 6 -8 hours
- Maximum adhesion after 48 hours (depending on temperature & humidity)
- Available in 1", 2", 4" x 60Ft standard roll size

Installations:

- Ensure that the surface is clean and dry, free of oils, sand or dust
- Release a part of tape liner
- Apply this part of the tape to the surface and continue removing the liner gradually
- The full adhesive strength is achieved after 48 hours after installation, try to avoid heavy use of the tape during this time

Considering various surfaces & application, the actual user shall perform his own tests to ensure that the product is suitable for his application and that it meets his demands
