Clinical Considerations

Not formulated with Natural Rubber Latex – primary material is acrylonitrile butadiene, reducing the potential for glove-associated Type I allergic reactions to natural rubber latex proteins.

Powder-free, minimizing the potential for powder-related complications, such as irritant contact dermatitis.

PURPLE NITRILE* Exam Gloves have an AQL of 1.0 for critical defects. This means that PURPLE NITRILE* Exam Gloves are significantly less likely to have critical defects than exam gloves that just meet the ASTM 2.5 AQL requirement.

TESTED AGAINST 29 CHEMOTHERAPY DRUGS

PURPLE NITRILE* Exam Gloves are an excellent choice for protection against chemical exposure. They have been tested against 29 chemotherapy drugs per the ASTM D6978-05 "Standard Practice for Assessment of Resistance of Medical Gloves to Permeation by Chemotherapy Drugs," as well as common chemicals found in the healthcare environment.
