

CHEMICAL SONIC BONDED ROLL

MELTBLOWN, CHEMICAL SONIC BONDED ROLL

- ❖ Weight 286 gsm*
- ❖ MODEL: 286MBYRB

Absorbency 136 Litres | 36 US Gallons of oil 110 Litres | 29 US Gallons of water

Base Fibre Polypropylene With a heavy fabric weight of 286 gsm this roll at 46 metres long, is half the length when compared to the lighter weight 165 gsm 92 metre long version, but offers a much heavier per square metre product.

The roll is made from a single layer of meltblown which is sonically bonded together. The sonic bonding points makes the absorbent less prone to stray fibres becoming detached and also gives the roll a very even structure which contributes to the good absorbency rate. The yellow colour identifies this roll as suitable for emergency use.

The roll is 76 cm wide by 46 metres long (30" x 150') and is made from a single layer of meltblown fibres with bond points and features perforations down its length, every 19 cm (7.5") and across its width every 50 cm (20") at no additional cost. The roll can be supplied in either a rigid cardboard box or a clear plastic bag.

Key Features

- ❖ Yellow colour code signals emergency use
- ❖ The roll is made from a single layer of meltblown that is sonically bonded together
- ❖ Good value and reliable performance
- ❖ Made from high quality polypropylene
